

# Multi-year Programming Grant: A Call to Action

---

Session 4: Future Outlook, Future Directions  
Wiley Barbour

Caribbean Cooperative MRV Hub  
Fourth Annual Meeting  
11-12 May 2022  
St George's, Grenada

## **The mission of the Caribbean Cooperative MRV Hub is to conduct cooperative activities that will lead to:**

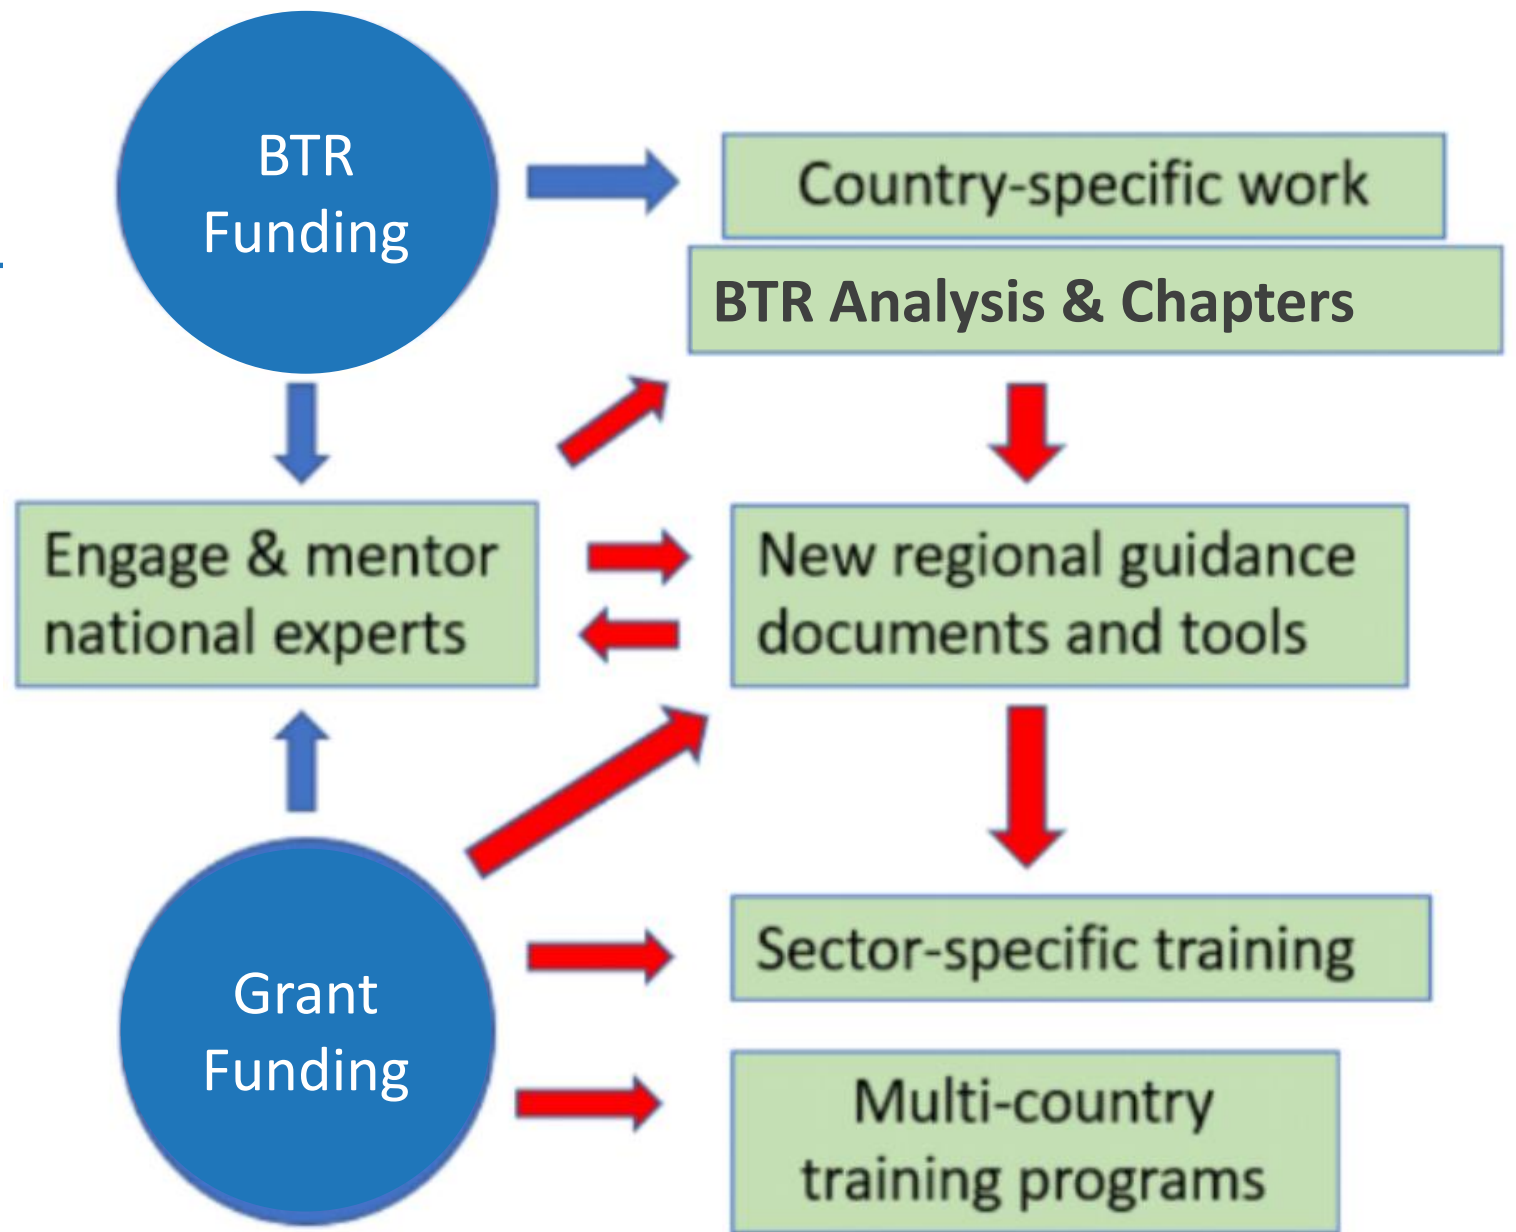

- Strengthened and sustainable technical capacity for reporting on GHG emissions and removals,
  - Empowered through regionally regionally pooled institutional arrangements and expert technical capacities,
  - Resulting in the availability of more complete data to support MRV activities and track NDCs, and
  - Enhanced transparency for both domestic policy-making and sustainable UNFCCC reporting.
- 

# MRV Hub Model

The MRV Hub will need a Phase 2 grant to continue to prepare for ETF/BTR transition.

Through a regional approach the IKI grant gave us core funding to build the program by directly engaging our member countries to produce outputs

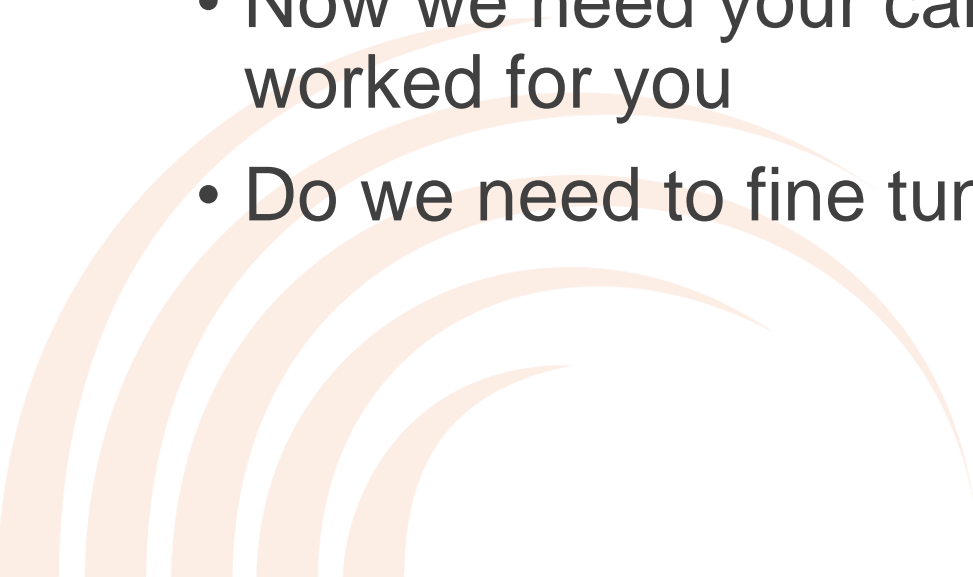

The country direct engagements enabled us expand scope and ability to .

*Diversified Workflow and Impact*

## Discussion – “let’s talk it out”

---

- We are 4 years into the grant and looking ahead
  - We have shared updates highlighting some successes and outputs
  - Looking towards an institutionalised MRV Hub, we have to ask- what does sustainability mean to you?
  - Now we need your candid feedback on how the grant has worked for you
  - Do we need to fine tune our workplan?
- 

# Scope of a future grant

---

- What should be included in a future grant proposal?
- Should it include data collection and activity data measurement activities?
  - For example, should we request funding for data collection for specific sectors and subsectors such as
    - Onroad mobile sources (vehicle counts, categorization support)
    - Agriculture (Modeling? Animal counts? Partnerships?)
    - Forestry, including ground truthing in the field?
  - Would a Mandatory Reporting guidance doc & conference be useful?
  - Certification of proficiency program?
  - Energy balances?

# Thank You

The Caribbean Cooperative MRV Hub (CCMRVH) is part of the International Climate Initiative (IKI). The Federal Ministry for the Environment, Nature Conservation and Nuclear Safety (BMU) supports this initiative on the basis of a decision adopted by the German Bundestag. And through support from the UNDP/UNEP Global Support Programme.

Supported by:

Federal Ministry  
for the Environment, Nature Conservation,  
Building and Nuclear Safety

based on a decision of the German Bundestag
