

**Caribbean Cooperative MRV Hub - COP27 Side Event:  
A cooperative approach to improving MRV Systems, transition to the ETF  
and tracking of progress in implementing and achieving NDCs**

**Agenda**

Friday 11<sup>th</sup> November 2022, Sharm El Sheik, Egypt (15:00 – 16:30)

**Background**

The Caribbean Cooperative MRV Hub (<https://ghginstitute.org/ccmrvh/>) is a 5-year project designed to foster regional technical excellence and generate stronger policy-relevant carbon accounting among 12 English-speaking CARICOM countries. The project is funded by the International Climate Initiative (IKI) of the Federal Ministry for the Environment, Nature Conservation & Nuclear Safety (BMU) of Germany and supported by the implementing partners: Greenhouse Gas Management Institute (GHGMI), Regional Collaboration Centre of the UNFCCC (RCC-STG), UNDP/UNEP Global Support Programme (GSP) with WINDREF taking on the pivotal role as institutional host. The MRV Hub is well into the actualization of its role as a learning and mentoring cooperative for a growing network of regional experts through direct engagement by member countries for support, guidance, training, capacity building and regional contracts.
